

APPLICATION FORM

Ukraine Energy Efficiency and Renewable Energy Programme (UKEEP)

EXAMPLE APPLICATION FORM

Company name and address:

OOO «Car part manufacturer»
123456, Ukraine,
city of example, example region,
Example street 123

Contact address:

123456, Ukraine,
city of Example, Example region,
Example street 123

Business Sector:

Car parts

Responsible Manager:

Mr./Ms. Example, Development Director

Phone / fax:

Phone: 123 12345677
Fax: 123 3456787

E-mail:

example@carpartscompany.com

Contact person (responsible for the project):

Mr./Ms. Example, Development Director

Phone / fax / e-mail for contact person:

Phone: 123 12345677
Fax: 123 3456787

1. Company Documentation:

1. Information regarding the borrower and description of:

- the basic business activity,
- shareholder structure,
- products
- production capacity and annual production volume,
- sales, and export share of sales
- main clients and suppliers,
- number of employees

Type your description here:

Production of car parts for sale to car producers.

Limited liability company.

Ownership:

OOO Holding company XYZ, Ukraine 95%

OOO Car manufacturer XYZ 2.5%

Private individuals 2.5%

Products:

Various car parts used in car manufacturing

Production capacity:

30 000 units of car part A

20 000 units of car part B

Annual production:

26 000 units of car part A (2006)

12 000 units of car part B (2006)

Sales:

200 000 000 UAH of which exports 95% (2006)

Main Clients:

Car manufacturer 1, Russia

Car manufacturer 2, Romania

Car manufacturer 3, Germany

No. of employees: 800

2. Investment Project Description:

1. Description of:

- the proposed project idea;
- description of the project's current stage of development (e.g. idea, prefeasibility study, engineering design, business plan, loan application; provide relevant copies);
- the parties involved in the development of the project idea.

For energy efficiency projects:

- the monthly energy carriers' consumption and costs (electricity, heat energy, fuels, biomass, water) for the last calendar year;
- existing total installed electric and heating capacity of the project or the project systems.

For renewable energy projects:

- expected monthly production of electricity and heat energy based on representative data.

Type your description here: Investment project idea: 1. New processing equipment for car parts 2. Isolation of building 3. Frequency converters and electrical supply Development so far: Idea stage. Energy consumption: 5 400 MWh per year of electricity 8 000 000 M ³ of natural gas per year
--

2. Project development activities executed until date – pre-feasibility studies, permits, etc. (Copies attached)

Type your description here: Preliminary investigations

3. Approximate total investment cost;

Type your description here: 3 000 000 USD
--

4. Project benefits (physical and monetary), operation and maintenance costs:

Type your description here:

Reduced energy consumption, both gas and electricity.

Estimated reductions about 40% of natural gas consumption and 20% of electricity worth approximately 600 000 USD per year.

5. Expected investment implementation period (months) from/to

Type your description here:

8 months from may 2008 to January 2009

6. Project ownership, investment scheme of the project sponsor and participation of related parties in the project, if any

Type your description here:

No other parties related.
